

Outdoor Pool Update
May 10, 2023

17 days until the outdoor pool opens!

We have the breaker box in hand, so our biggest risk has been mitigated.

Burelson has power washed the pool and is applying the plaster today. Once this is complete, we will begin filling the pool – a 3 day process. Pumps will be turned on and the chemicals will be added and managed until we get the right balance. This can take a couple of weeks as you might imagine.

The County Health department will be on site Thursday to start the final permitting for us to open on Saturday May 27.

The final concrete pour will take place early next week and the perimeter fence will be completed soon after. Clean up outside of the fence will be done next week and a combination of rock and grass will be put into place to complement the new pool.

Please plan on attending the Grand Opening at 9:00 a.m. on May 27, come ready to participate in a Group Plunge to open the pool.
